India Solar Energy Overview

Insights into India's Solar Energy Generation and Impact

Today Date

26 May 2026

Total Installed Capacity

20M

Power Generated Trend

115.78M

Total CO2 Saved

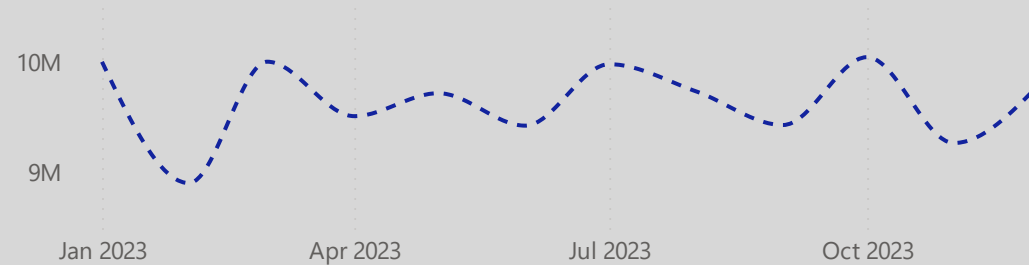

83.36M

Total Maintenance Cost

237.71M

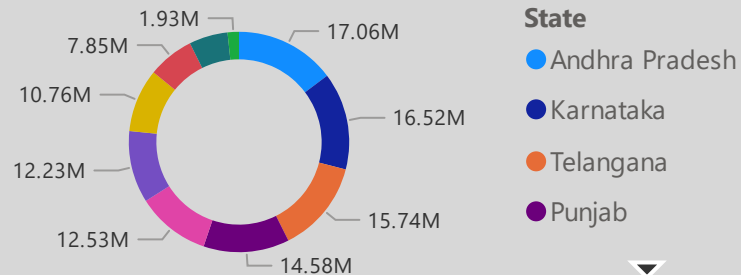

Power Generated Over Time(TWh)

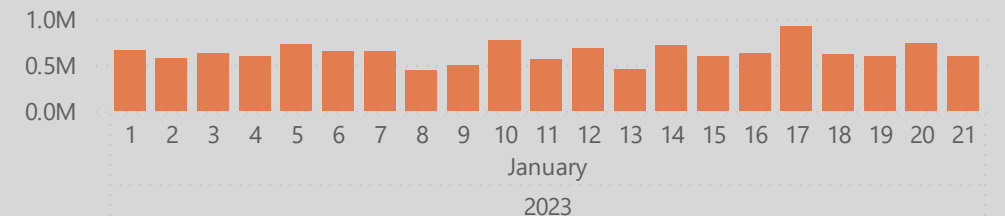

Installed Capacity by State(GW)

Power by State(TWh)

Maintenance Cost Trend by Year, Month and Day

India's solar Energy capacity and generation have grown significantly from 2020 to 2023.

Total installed capacity increased by 73.65% and power generation increased by 222.22% during this period
